

User Story 1:

Bob is an inmate at a correctional facility.
He has a wife and 8 year old daughter at home.
Bob has had some experience with this system,
he has had several of these book readings with
his wife and daughter is already.
Bob has a scheduled visit with his daughter
today at 4:00pm, his wife will be present
to help his daughter get connected to the system.
^{Bob} logs in, ^{then} Bob selects 4 books to read to his daughter (short stories)
- her favorite ones.
Bob presses the call button, the guard shows up
and types password in to approve the call.
After a moment Bob is connected, his daughter
is now on the screen smiling and jumping around
because she's so excited. Bob reads her
her favorite stories - same as last week and probably
the same for next week. Now the ~~the~~ visit
time is up, they say Goodbye and call disconnects.

Tasks:

- Bob logs into system at the correctional facility
- Bobs wife logs in from their tablet at home
- Bob selects the books - his daughter always requests the same 4
- Bob reads the book, daughter listens & reads along
- Timer is up, call is ended
- Bob is booted off the system automatically?
- Bobs wife also gets kicked back to login (standard procedure)

Story 2:

Rhonda is an inmate at the state prison, and has just been approved for the reading program. She has one 10 year old son, who will be supervised by his father. Rhonda has a reading session scheduled for an hour today, and will be supervised by a prison guard.

Rhonda logs onto the system and chooses a book she thinks her son will enjoy. She gets guard approval, and greets her son before starting to read. She reads the book to her son, before talking about what book they would like to read next week. Rhonda says goodbye to her son and the session ends.

Tasks

- Rhonda logs in
- Father logs in
- Rhonda chooses book and gets guard approval
- Rhonda reads the book
- Rhonda logs off
- Father logs off
